

SPINTLY VMS

Contactless Visitor Management System

Product Overview

SpintlyVMS, (Visitor Management System) is designed to automate and effortlessly manage visitors at your organization. Pre-register your scheduled visitors using our mobile app to save time and provide relevant information to your security personnel for a quick, hassle-free and contactless check-in & verification process. By monitoring and filtering your visitors, Spintly-VMS improves the security of your premises and at the same time maintains all records of past visitors for future audits and reviews.
