

SÔLT Wireless Calling System

THE BEST CALLBELL
FOR THE BEST PLACES

Superior Performance Parameters

Wireless Calling System

Wall-mounted receivers

- Frequency Type: FSK Exceptional accuracy and stability of signal reception (superior to ASK)
- TCXO-based RF Low RF variation, No clock defect (superior to X-tal)
- Variety of Functions Alert sound selection (22), Volume control (9 settings), etc.
- Linked Transmitter Can be linked to up to 1,000 individual call bells

Transmitters (bells)

- Frequency Type: FSK Exceptional accuracy and stability of signal transmission (superior to ASK)
- CPU Embedded Able to delete repeated call IDs, Smart functionality (superior to Remote IC)
- Tx Controllable Efficient battery life, no interference to or from other bells
- Others Broader call range, Battery saving algorithm

Portable receivers (paggers)

- Frequency Type: FSK Exceptional accuracy & stability of signal reception (superior to ASK)
- TCXO-based RF Low RF variation, No clock defect (superior to X-tal)
- Direct Call Receiving Receives calls direct from bells (i.e. a transceiver is not necessary)
- Others Maximized battery time & call range, battery recharged easily and rapidly

Elegant Design

Guest Paging System

Transmitter

- Sophisticated digital design
- Elegant form, similar to a mobile-phone
- Smooth edge and rounded corners
- LCD panel renders the units very easy to use - Easy registration and operation, Touch panel, Haptic feedback
- Dual-power available - AC/DC adaptor and/or Rechargeable built-in battery

Receiver (guest pager)

- Modern and luxurious design with minimalist aesthetic
- Opaque base gives light, floating image, dual-LED call indicators are installed in top and in the base,
- Perfectly circular shape combined with metallic black color results in pleasing body line and aesthetics
- TPU band applied..... water resistance
- External access ensures rechargeable battery is quickly and easily replaceable

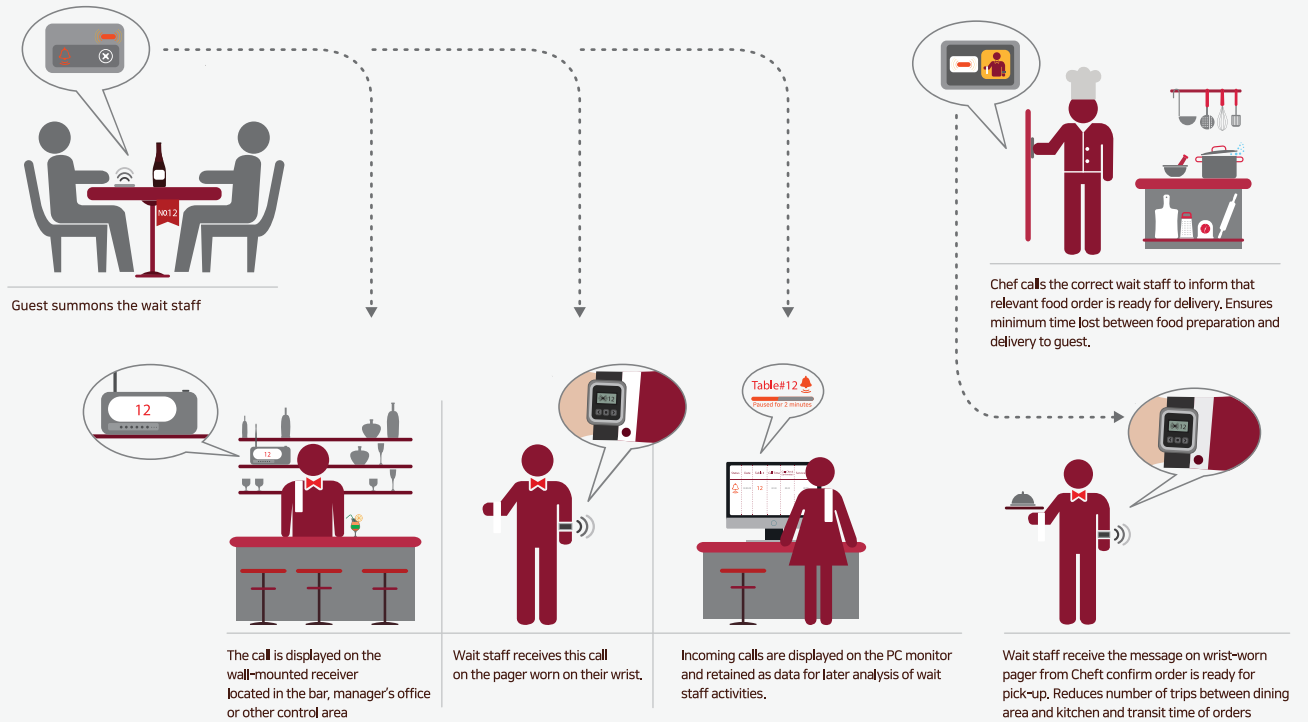

The units are magnetized to maximize charging efficiency and promote efficient, aligned storage and transportation

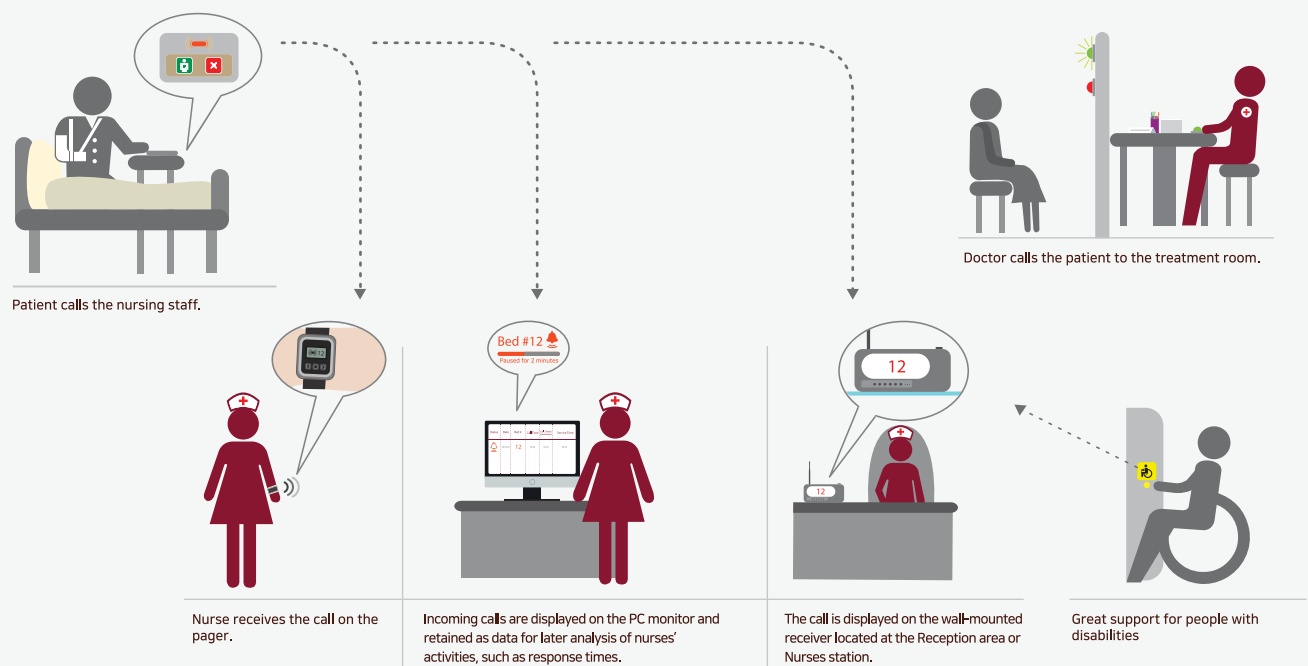

Highly robust construction and build quality protects against impacts, such as being dropped

In restaurants

CONCEPT OF SYSTEM

In hospitals

In factories

Worker calls a staff member (material supplier, technician, manager etc.)

System greatly increases levels of work efficiency amongst staff and of equipment.

System reduces response time of staff

System enables the paging of a specific staff or worker and indicates the reason for the call.

Relevant staff member receives the call on their pager, worn on their wrist.

Incoming calls are displayed on the PC monitor and retained as data for later analysis of staff member's support

SOLT

In food courts

Guest receives a pager after placing an order at counter.

When the requested food is ready, the transmitter alerts the relevant pager

Guest can relax whilst waiting to be called by the pager, with no need to wait in line

Guest is now aware that their order is ready for pick-up.

Guest returns the pager upon collecting the prepared foods.

Product Line up

WIRELESS CALLING SYSTEM - F&B Solution

Category	Model	Image	Button	Display	Power	Size (mm)	Weight (g)	Colors	Remark

RELIABLE WIRELESS
CALL SYSTEM

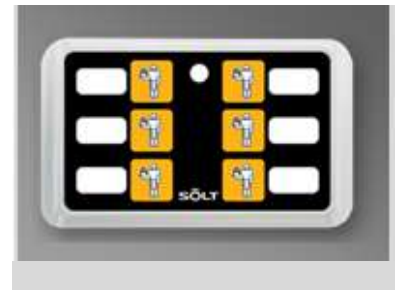

APPLICATION CATALOGUE

APPLICATIONS

- Hospitals
- Restaurants
- Hotels or Resorts
- Poolside
- SPA
- Resorts
- Retail
- Supermarkets
- Manufacturing
- Construction Sites
- Offices
- Home / Villas
- Schools
- Panic Button
- Survey

CALL BUTTONS AND DISPLAYS

RESTAURANTS

- Excellent reliability
- Interiors
- Operations
- Quick and on-time customer service
- Increased efficiency of workforce
- Quick table turnover
- Easy installation and use

HOTELS OR RESORTS

Guests can silently call for service

- Restaurant
- Bar
- Pool Side
- SPA
- Meeting Room
- Sun lounges or Cabanas
- Private Villas
- Yachts
- Banquets
- Gym etc.

POOLSIDE

- Multiply orders
- Cover large service area
- Respond promptly
- Extremely reliable plus heat and water-resistant
- Waiters spend less time running around and more time with quicker service to customers
- Increased customer satisfaction leading to higher revenue

SPA

- Spa and Wellness places are popular places for a call button
- Spa guests or therapists can just call the staff For assistance at the touch of a button

RESORTS

- The Service team can easily cover large serving areas
- Respond immediately
- Spend less time running around
- Spend more time with customers
- Enhanced customer satisfaction
- Increase in revenue

RETAIL

- Maximises Selling Opportunities
- Creates Operational Efficiencies
- Increases Customer Interactions
- Connects Ready To Buy Shoppers with Sales Associates
- No Added Infrastructure Required
- Low-Cost, Small, and Easy to Install

Areas

- Various departments such as changing room of the clothing store: A customer does not have to leave the changing room if she requires a different size

SUPERMARKETS

- Improved service
- The customer spends less time running around
- More time with customers
- Efficient service leads to enhanced customer satisfaction hence increase revenue

MANUFACTURING

- Notification on the wearable device to a specific employee indicating the area where help is needed
- Display each call on the screen of the computer or display located
- Know the response time of personnel spent on troubleshooting
- Connect radio relays and devices with dry contact
- Playback of pre-recorded sound notifications through loud notification.

CONSTRUCTION SITES

- Increase efficiency of working staff and equipment
- Reduce the response time in case of need
- Call the expert using a multi-call button with the reason for the call
- Elevator / Material Hoists / construction hoists
- Signal stability and strong penetration
- Multiple calls on display
- Use at construction site office
- Prompt assistance

MEETING & BOARD ROOMS

- Call for assistance
- Call for refreshments
- Speed of service with discretion

OFFICES

- Call for assistance
- Call for refreshments
- Speed of service with discretion

HOMES / VILLAS

- Designed to integrate seamlessly with luxurious decor
- Easy to operate
- Maintaining the high standards of service
- Prompt response

SCHOOLS

- Teachers, Assistants can call for help
- Effective child care
- Emergency response
- Handle panic situations
- Avoid accidents
- Discrete communication

HOSPITALS

- Better communication enables effective patient care
- Promptly respond to patients
- Providing most effective patient care is a key to success
- Patient's satisfaction is crucial for referrals
- Reliable and proven technology
- Code blue alerts
- Helps meet NABH, JCI certification requirements

PANIC BUTTON

- Wireless installation
- Modular & flexible systems
- Low maintenance cost system
- Technology-oriented and user-friendly.

SURVEY

- Feedback at the "Push of a Button"
- Real-time data delivery to a server
- Customers/Guests/Patients can rate their experience
- Collect feedback statistics
- Long battery life
- Quick and Easy Wireless setup
