# onetouch

ONETOUCH PUSH PULL TYPE DIGITAL DOOR LOCK – OT-500

Onetouch OT-500 is a rugged and convenient Push Pull type Digital Door Lock with Biometric , Touch Key Passcode and Mechanical Key with auto glow capacitive backlight keys.

Secure Functions :

Anti Panic of One Way Push : In the event of an emergency , such as Fire , the anti panic feature enables residents a quick and safe evacuation by pushing.

Fire Detection Function : In case of sensing high temperature over 60℃, it alarms and activates door open function.

Passcode Hide Function : Use the fake number and actual number together whenever there is any chance of exposing the passcode to others.

Prevention of Electronic Shock and Static : To prevent illegal entry using the electric and electronic shock , the superior circuit blocks the impact

Door Control by Wireless Connect : OT-500 can be integrated with Video Door Phone and Home Automation system using the Wireless RF Kit to control the door

Emergency Battery
Use 6V battery to initialize lock when the lock shuts down due to discharged battery
